REQUEST FOR CORRECTED FILING RECEIPT

Dear Sir:

Applicants received an official Filing Receipt for the patent application referenced above.

Applicants would like the following correction to be made on the Filing Receipt:

(1) In the title, correct the spelling of "Clossure" so that it reads:

-- Closure --

The following documents are enclosed herewith:

- Copy of the first page of the specification mailed to the U.S. Patent and Trademark Office on April 4, 2004

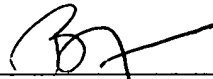

with the correct spelling of "Closure" highlighted in the tile.

- Copy of the first page of the Application Data Sheet mailed to the U.S. Patent and Trademark Office on April 2, 2004 with the title highlighted.
- Copy of the Filing Receipt, with the requested correction noted thereon.

Applicants respectfully request that the official records for the above application be changed to reflect the above correction, and that a corrected Filing Receipt be issued.

Respectfully submitted,

Date: **July 19, 2004**

**LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15**

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

CLOSURE DEVICE FOR THE FLUID DELIVERY LINE OF A HIGH-PRESSURE CLEANING APPARATUS

The present disclosure relates to the subject matter disclosed in international application PCT/EP 02/13414 of November 28, 2002, which is incorporated herein by reference in its entirety and for all purposes.

BACKGROUND OF THE INVENTION

The invention relates to a closure device for the fluid delivery line of a high-pressure cleaning apparatus having arranged in the fluid delivery line a closure member which is pressed with a closing force against a valve seat and thereby closes the fluid delivery line, and which is liftable off the valve seat by a mechanical actuating element displaceable by a hand lever and extending in a sealed manner out of the fluid delivery line, when the hand lever is moved in the direction of an open position.

Such closure devices are known, for example, from DE 81 18 510 U1 or from DE 35 27 922 C2. To ensure reliable closing of these closure devices, they are usually constructed in such a manner that during the opening the closure members are lifted off the valve seat against a relatively high force, and, therefore, opening for some time may prove tiring.

Special mechanical aids are, therefore, provided in the above-mentioned known closure devices to reduce the holding forces when the closure device is open. These are additional clamping devices or spring devices which engage the hand lever. However, these may be trouble-prone, especially when the closure devices are improperly handled or undergo aging processes.
